for
RATIONAL MECHANICS
and
ANALYSIS

Edited by
C. TRUESDELL & J. SERRIN

Volume 76

SPRINGER-VERLAG
BERLIN · HEIDELBERG · NEW YORK
1981

The exclusive copyright for all languages and countries, including the right for photo-mechanical and any other reproductions, also in microform, is transferred to the publisher. Authors of this journal can benefit from library and photocopy fees collected by VG WORT if certain conditions are met. If an author lives in the Federal Republic of Germany or in West Berlin it is recommended that he contact Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2, for detailed information.

Die in der Zeitschrift veröffentlichten Beiträge sind urheberrechtlich geschützt. Alle Rechte, insbesondere das der Übersetzung in fremde Sprachen, vorbehalten. Kein Teil dieser Zeitschrift darf ohne schriftliche Genehmigung des Verlages in irgendeiner Form – durch Fotokopie, Mikrofilm oder andere Verfahren – reproduziert oder in eine von Maschinen, insbesondere von Datenverarbeitungsanlagen, verwendbare Sprache übertragen werden.

Auch die Rechte der Wiedergabe durch Vortrag, Funk- und Fernsehsendung, im Magnettonverfahren oder ähnlichem Wege bleiben vorbehalten.

Fotokopien für den persönlichen und sonstigen eigenen Gebrauch dürfen nur von einzelnen Beiträgen oder Teilen daraus als Einzelkopien hergestellt werden. Jede im Bereich eines gewerblichen Unternehmens hergestellte oder benutzte Kopie dient gewerblichen Zwecken gem. § 24 (2) UrhG und verpflichtet zur Gebührenzahlung an die VG WORT, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2, von der die einzelnen Zahlungsmodalitäten zu erfragen sind.

Autoren dieser Zeitschrift können unter gewissen Voraussetzungen in die Individualausschüttung von Mitteln aus der Bibliothekantieme und dem Fotokopieraufkommen mit einbezogen werden. Genaue Informationen erteilt die Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2.

Mechanicam vero duplicem Veteres constituerunt: Rationalem quae per Demonstrationes accurate procedit, & Practicam. Ad practicam spectant Artes omnes Manuales, a quibus utique Mechanica nomen mutuata est. Cum autem Artifices parum accurate operari soleant, fit ut Mechanica omnis a Geometria ita distinguatur, ut quicquid accuratum sit ad Geometriam referatur, quicquid minus accuratum ad Mechanicam. Attamen errores non sunt Artis sed Artificum. Qui minus accurate operatur, imperfectior est Mechanicus, & si quis accuratissime operari posset, hic foret Mechanicus omnium perfectissimus.

NEWTON

La généralité que j'embrace, au lieu d'éblouir nos lumieres, nous découvrira plutôt les véritables loix de la Nature dans tout leur éclat, & on y trouvera des raisons encore plus fortes, d'en admirer la beauté & la simplicité.

EULER

... ut proinde his paucis consideratis tota haec materia redacta sit ad puram Geometriam, quod in physicis & mechanicis unice desideratum.

LEIBNIZ

The ARCHIVE FOR RATIONAL MECHANICS AND ANALYSIS nourishes the discipline of mechanics as a deductive, mathematical science in the classical tradition and promotes pure analysis, particularly in contexts of application. Its purpose is to give rapid and full publication to researches of exceptional moment, depth, and permanence.

Each memoir must meet a standard of rigor set by the best work in its field. Contributions must consist largely of original research; on occasion, an expository paper may be invited.

English, French, German, Italian, and Latin are the languages of the Archive. Authors are urged to write clearly and well, avoiding an excessively condensed or crabbed style. The editors reserve the right to return to authors manuscripts found deficient in style, form, or clarity.

Manuscripts intended for the Archive should be submitted to an appropriate member of the Editorial Board.

CONTENTS OF VOLUME 76

| | |
|--|-----|
| ALEXANDER, J. C., & S. S. ANTMAN, Global and Local Behavior of Bifurcating Multidimensional Continua of Solutions for Multiparameter Nonlinear Eigenvalue Problems | 339 |
| AMICK, C. J., & J. F. TOLAND, On Solitary Water-Waves of Finite Amplitude | 9 |
| ANTMAN, S. S., see ALEXANDER, J. C. | 339 |
| ANTMAN, S. S., & C. S. KENNEY, Large Buckled States of Nonlinearly Elastic Rods under Torsion, Thrust, and Gravity | 289 |
| BRUNNSCHWEILER, A., A Connection between the Boltzmann Equation and the Ornstein-Uhlenbeck Process | 247 |
| CASEY, J., & P. M. NAGHDI, An Invariant Infinitesimal Theory of Motions Superposed on a Given Motion | 355 |
| COHEN, H., see MURDOCH, A. I. | 393 |
| DAY, W. A., On the Quasi-static Approximation in Dynamic Linear Viscoelasticity | 265 |
| DAY, W. A., Generalized Torsion: The Solution of a Problem of Truesdell's | 283 |
| HOLMES, P., & J. MARSDEN, A Partial Differential Equation with Infinitely many Periodic Orbits: Chaotic Oscillations of a Forced Beam | 135 |
| HUILGOL, R. R., On Zorawski's Condition for a Velocity Field in One Frame to be Steady in a Second Frame | 183 |
| KENNEY, C. S., see ANTMAN, S. S. | 289 |
| MARSDEN, J., see HOLMES, P. | 135 |
| MEYER, J., & J. SCHRÖTER, Proper and Normal Solutions of the Fokker-Planck Equation | 193 |
| MURDOCH, A. I., & H. COHEN, Symmetry Considerations for Material Surfaces: Addendum | 393 |
